Green Pill

All the boulevard … -it was put out there;
To disguise the news for it's trivia.
There's a huge range of pulp for you.
And you chew on it, so educated.

There's a green pill, it's still waiting for …
-You to grasp the fact, they invent their own …
-Oppositions, and you follow.
If they can't get you, than your group's too small.

Don't watch Game of Thrones, it just mushes brains.
It's a soft porn without narratives.
So what do I care, WTC was too.
They sold war to you and airport safety.

When they are pushing, to sell their own guns;
They employ actors to stage in a drill.
They say: Choose a pill! -But where's the green ones?
I'd rather not be on their sides.

If media shows specialists …
Are you gonna unlearn your talents?
And if the stars name their children dump …
Would you wanna be called Microwave?

And if social apps share your stuff for free …
Will you love it, to end up starving?
Is there anything you have learned from me?
Or did I just steal some lifetime from you?
